# Portfolio Website

Developed & Presented by: Asma Alghamdi

# Objective

Why build a portfolio website?

# Features

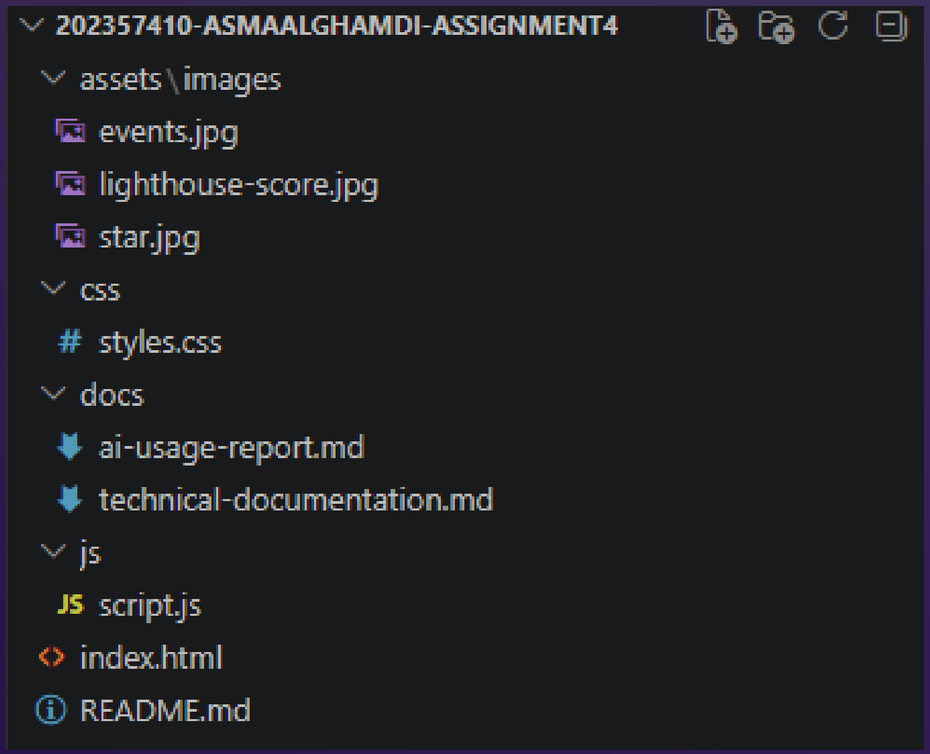
- Navigation between sections
- Interactive user guide
- Project filtering and sorting
- GitHub API integration
- Dark/light mode
- Contact form validation
- Personalized greeting

# Live Demo

https://asma-ghamdi.github.io/202357410-AsmaAlghamdi-assignment4/nisl blandit.

# Technical Architecture

- HTML → structure
- CSS → styling & responsiveness
- JavaScript → interactivity
- GitHub API → dynamic data
- localStorage → saving preferences



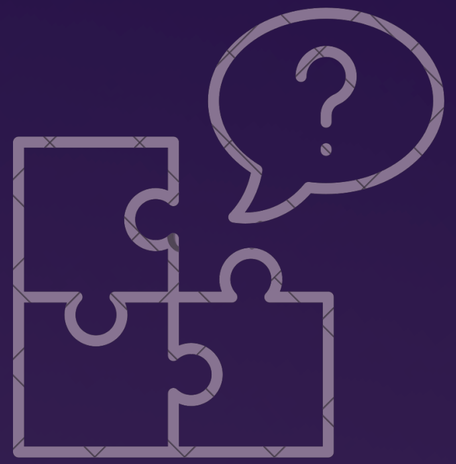
# AI Integration

Used ChatGPT for:

- debugging
- feature implementation
- deployment guidance

Reviewed and modified all outputs

# Challenges & Solutions



- Managing multiple JS features
- Connecting API data
- Ensuring responsiveness

# Conclusion

# Thank You
